

ENVIRONMENTAL TESTING - WASTEWATER FAQS

Recommended Test Packages

	Required Sample Size	Turnaround Time	Price
NPDES PACKAGE FOR WASTE WATER	500mL	5 - 7 BD	\$97.50
Total Cadmium, Chromium, Copper, Lead, Nickel, Zinc (total recoverable or dissolved) (includes sample preparation)			

- Midwest Laboratories can perform almost all testing required on NPDES permits.
- We are certified in many states that require lab certification for wastewater testing.
- Contact your account manager to set up a testing kit supply schedule that ships according to your permit or needs.
- Pour acid into bottles immediately after sampling and include sample date and time on your chain of custody. Always add acid to water, never water to acid.
- It is necessary to use ice if you are sampling for compliance or regulatory reporting. Samples received need to be 6 degrees C or below.
- For hold times, container requirements and preservation information please visit the following document: www.flenviro.com/FDEP_Holding_Times_and_Preservations.pdf
